

Installation instructions for Access runtime Office 2007 users

In order to run the iSBEM software you need to have Microsoft Access installed on your computer. If you don't have MS Access, please follow the instructions below to install a runtime version of MS Access 2007. Please note you will need to install MS Access before installing the iSBEM software.

How to install MS Access runtime on your computer:

1. Please ensure you select the correct version of the MS Access runtime to your Office system on your PC.
2. Click on the hyper link and save **Access Runtime.exe** file onto your desktop (do not open the file at this point).
3. Once the download has completed, from your desktop Double-click **Access Runtime.exe** file to initiate the installation process. You will need to accept the Microsoft Licence terms to continue with the installation. Follow the instruction on the screen, once the installation has completed you can close the window.
4. You will then need to install the iSBEM software after installing the Access runtime.

Please do not forget to report bugs or any comments for iSBEM to the Development Team using the feedback page
